

# Reading Stove Company

## **Reading Stove Company**

manufactures and sells a full line of coal stoves. All Reading coal stoves are made in Pottsville, Pennsylvania and are on display at the Reading Stove retail store located at 16 Summer Valley Road in Orwigsburg, PA.

With the rising costs of heating sources, Reading coal stoves provide the most economical heating alternative. They can be used as a main or supplemental heat source.

Reading Stove Company uses the patented “Tri-Burner” Stoker System with a variable heat control. The stoves are available in contemporary or classic styles.

Reading Stove Company’s sister company Reading Anthracite Company is an anthracite mining, processing and sales organization providing anthracite fuel to the customers of our line of anthracite stoves.
