

Waste Management and Processors, Inc.

Waste Management and Processors, Inc. (WMPI) specializes in supplying fuel to the co-generation industry and is the principal fuel supplier of Gilberton Power Company, an 80 megawatt co-generation facility located in Frackville, Pennsylvania.

WMPI has access to significant fuel reserves and can blend fuel to meet a broad range of fuel specifications relating to BTU and moisture content. In addition to being a fuel supplier to the co-generation industry, WMPI performs reclamation of mine sites utilizing ash from coal burning electric plants. WM&P works with its affiliate, American Green, to vegetate reclaimed mine sites utilizing bio-solid applications.
